

# Digital Healthcare on Wheels

Several solutions to address digital healthcare everywhere, allowing caregivers to comfortably work standing or seated. From the autonomously powered MediPod® Power (with a generous onboard Li-Ion battery with 521 Wh) to our line of eWork Carts, in case you need more storage for therapy.

## MediPod®

- long lasting onboard battery
- height-adjustable: to work standing or seated
- small footprint and accessorizable

## eWork Carts

- plenty of space for therapies
- large choice of accessories
- several sizes and configurations available

## The universal EXPER-mod: efficiency in motion

## Crafting unique designs

### Content in motion

At FH we transform static drawers into active components of a logistic system: the EXPER-mod is transportable and interchangeable with all our trolleys, shelving systems, logistics columns, cabinets and picking stations.

EXPER-mod is also available transparent: all contents are perfectly visible

EXPER-mod features easy to change colored ID tags and a handle on the full width.

EXPER-mod features a removable label holder with see-through cover and a large paper label.

EXPER-mod is made of 100% recyclable injection moulded ABS plastic, and can be washed up to 70°C.
